

BILGE BAGS

nochar's **A676 Petro Bond Bilge Bags™** are designed to be compact and efficient. The **A676 Bilge Bag** utilizes exclusively nochar's **A600** product so that complete bonding can take place. A convenient eyelet allows a string to be attached for easy removal. Place the **A676** in your bilge and tie off the string in a convenient place. When ready to remove, pull the filled bag out of the bilge and replace with a new one.
